Erin—

Here is a follow up from Atty Upton. Looks like there are a couple of things on the list. They can be worked out with the BI from MRI.

Bart

Hey Bart:

I spoke with the Town Administrator this morning and she got a call from your client to renew the building permit. Your client also mentioned an accessory dwelling that is attached to the barn. The plans at the Town Hall do not show and ADU.

Karen does not want to get in the middle so we would like to bring in the person from MRI to oversee the project and the renewal of the building permit. It would be my suggestion that we have the person from MRI contact your client directly to ensure no delays in the back and forth. I believe Karen has your client's contact information.

The person from MRI can also talk about any inspections that may be needed now or in the future. I don't want us to get to the occupancy permit stage and have problems. Better to get everyone on the same page.

Hope you are doing well!

Matthew H. Upton
